

WELLOPS

PROJECT OVERVIEW

SEAWELL

Over the last 7 years, Super Triton #11 has been mobilised onboard the Seawell. Predominately working in the British sector of the North Sea, with the odd 6 months in Norway.

During this time, Canyon Offshore have been in contract with WellOps working for various clients including : Shell, BP, Exxon Mobil, Talisman, PetroCanada, Fairfield, Total, Statoil

The ROV services onboard the Seawell included the following:

- As found / As left surveys
- Wellhead / Structure cleaning
- Guidewire / Guidepost Installation
- Inspection
- Diver Support
- Stab plate make-up and removal
- Fly to place umbilical work
- Well intervention—via TDU (Tool Deployment Unit)
-

WHAT CUSTOMER HAD TO SAY:

“Overall good functional performance. Some problems with ST11 Camera, but well managed & avoided any impact on operations. A-frame hydraulic hoses failed, oil was immediately contained and hoses replaced” Shell EPE Ltd, Gannet project (July 2008)

“Overall Excellent functional performance. Both ST11 / SM08 worked very well through marginal weather. Attendance and participation of crew was good” Total E&P, Otter & Alwyn scale squeeze (Sept—Oct 2008)
